## EFFECTIVE LEADERSHIP

The institute governance and management operate at three levels – the overarching Trust/Management, Principal and the various committees and cells. Roles and responsibilities are distributed across these three levels,

- The lower levels looking after more specific and smaller aspects of governance and management than the higher.
- The management system of the institution is highly decentralized and participatory in nature.
- The higher level of management allows considerable autonomy, but also provides adequate support, to the lower level in its functioning.
- The college works on the principles of teamwork, collective responsibility and participatory management.

For various aspects of the daily work of the college, there are committees and subcommittees to look after the work. There are similar mechanisms for overall coordination and monitoring. In case of academic matters, the heads of various departments are involved.

- For administrative matters, the Principal and Office Superintendent together with the coordinators are involved.
- For financial matters the principal and various committees hold the responsibility of management and monitoring.

In all these matters, there is adequate representation of the teaching and the non-teaching staff, and in some cases, of students and alumni. The planning and decision making at all levels is collective and collaborative. The teaching staff also contributes to various administrative responsibilities. The heads of various departments enjoy autonomous responsibility of their departments and they in turn work collectively with the departmental staff members to manage their affairs.
