*** INSTITUTE CODE DTE 4643, PCI 3122, UNIVERSITY P253, MSBTE 1987**

7.1.4: water conservation facilities available in our institution:

Rainwater harvesting: The institution has installed a rainwater harvesting system to ensure the supply of groundwater. Rainwater harvesting is done at several points throughout the campus. The rainwater gathering pits were built according to industry standards. Rainfall is directed through wide shallow ditches that run the length of the campus, ensuring rainwater conservation. All open terraces are equipped with rainwater collection pipes that are routed to the ground via planned drains.

Borewell:

In our Maharashtra Institute of Pharmacy, we have a borewell system for water suppliers. Borewell provides natural water present under the ground. This water reaches natural material, unlike the treated water from the water supplier.

Water tank:

In our Maharashtra Institute of Pharmacy, we store the water in the water tank. These buildings contribute to effective water storage, guaranteeing a steady supply for a range of college activities.

Sewage water treatment:

Water is a basic necessity of life and used for many purposes recycling water is necessary considering this is our mind. We have established sewage treatment in our Maharashtra Institute of Pharmacy with the assistance of STP. A sewage treatment plant is the process of purification of sewage water and reusing it for gardening, agriculture, and other general process.
