7.3.1: Portray the performance of the Institution in one area distinctive to its priority.

The institute's driving principle and vision are developing integrated manpower with the right attitude and possessing the knowledge and skills required to make an honorable living and contribute to society's socioeconomic development and welfare. The only thing that makes the institution unique is its entirely student-centered activities; every academic function is pro-student, and we consider every student who comes to us to be fortunate enough to advance his career through a comprehensive academic experience.

The excellent and inspiring learning environment that is established on campus reflects the uniqueness of the institution. In addition to the infrastructure that facilitates the delivery of high-quality education, the teaching and learning activities were improved by the qualified and committed teaching staff. The college's hiring practices for new instructors demonstrates its uniqueness. We are eager to assign individuals who are recent graduates of the same disciplines or who are college alumni to teach in the various departments. We trust in the students who are educated from our college and in this way, we get an opportunity to avail the jobs to our students. However, when it comes to their responsibilities, these teachers show a great deal of loyalty and dedication.

The amenities offered to students with disabilities are what make the college unique. Lifts, ramps and rails, restrooms, scribes for examinations, and more are among the amenities. The college's unique quality is its ideal green environment. It is a captivating sight to see the boys and girls playing a variety of sports on the lush lawn while being supervised by the coach and trainers.
